

Fish Printing

**Saturday, June 6
10:00 AM-1:00 PM**

Gyotaku is a traditional method of Japanese fish printing or fish rubbing. This ancient art dates back to the mid-1800s and was used by fishermen to record their catches. Japanese fishermen used non-toxic ink so they could record their catch, wash away the ink, and still eat the fish. Over time, it has become its own form of art.

Join us at the Environmental Discovery Center to make your own fish print art. We'll supply bandanas for each participant, but you're welcome to bring a t-shirt to decorate as well.

There is no fee for this event and registration is not required. For more information, please call us at (843) 389-0550.
